CERTIFICATE OF UNIDENTIFIABILITY OF REMAINS

1. The records pertaining to Unknown X - 77, Plot M
Row 9, Grave 221, USMC ANDILLY, France,
have been reviewed and it is the opinion of this Office that sufficient
evidence is not available at the present time to establish the identity
of the deceased concerned. The remains concerned should be classified as
unidentifiable at the present time.

2. Report of Reprocessing of remains was forwarded to your
Office by Transmittal Letter No. 2126, dated 28-12-46.

3. Remarks:

This dental chart is very important and should be filled in with great care. There are 32 teeth to be accounted for, as shown by the numbers on the chart. Beginning at the middle line in both upper and lower jaws, the teeth are arranged symmetrically on either side and classed as incisors (cutting teeth), cuspids or canines (tearing teeth), bicuspids (chewing teeth), and molars (principal chewing teeth). An examination should be made and findings charted to cover the following basic conditions: Lost teeth, crowned teeth, bridge work, fillings, caries (cavities of decay), dentures (plates), and any deformity of jaws found. See reverse side for illustrations.
