REMARKS:

Form 11 Identification Check List and Form 1A Tooth Chart accomplished.
 Unable to obtain fingerprints because of missing and decomposed portions.
 Only one right radius recovered.

Other Identification Clues, Extracted:

Upon reprocessing by Subordinate Identification Point #1 Carentan, Case Unknown X-455, was found to be a mass burial of four (4) men. Because of the difference in size and structure in the bones, separation was possible. Segregation was made into cases Unknown X-455 A, B, C, and D. Due to the small amount of bones recovered, the four remains were buried in one casket.

No clothing found. The teeth found were a mass common among the remains. They were all placed with remains of case A and the Tooth Chart is enclosed with case papers of case X-455 A.

Original Report of burial found in debris states the following:

"This body disinterred from common grave. (Buried by Germans. No records. With Georges E. Tillett, 13047453, X-450, X-451, X-452, X-453, X-454, X-456 and Edward A. Bochniasz 16016671. 5 miles N.W. of Pont-Hebert".

It is possible that consolidation can be made with any of the cases referred to in the above mentioned burial report.

As no positive identifying clues were found, case remains unknown.
